PROFESSIONAL SUMMARY

Software Analyst & Developer focused on requirements elicitation, high-impact interface design (UI/UX), and Artificial Intelligence integration. Experienced in process automation and leveraging LLMs (Claude, Groq, Gemini) to build robust, innovative solutions. Passionate about the Deep Work methodology and continuous learning to deliver top-quality software.

EDUCATION

Servicio Nacional de Aprendizaje (SENA)
Technology in Software Analysis and Development

Colombia
Expected 2027

TECHNICAL & SOFT SKILLS

Languages & Web: Python, JavaScript, HTML Living Standard, CSS (Material Design 3), Tailwind CSS
AI & Automation: Prompt Engineering, LLMs (Claude, LLaMA, Gemini), Groq API, Data Analysis
Tools & Core: Git, GitHub, Docker, VS Code, Requirements Elicitation, Systems Architecture

PROJECTS

ProAssist

Bilingual Intelligent Assistant (Python, Groq API, Docker, Render)

- Developed a limitless productivity chatbot powered by LLaMA 3.3-70B via Groq API.
- Containerized the environment with Docker and deployed on the Render platform for high availability.
- Implemented real-time complex query processing capabilities.

APPFOCUS CORE v3.0

Productivity Terminal (JavaScript, Tailwind, Offline-First)

- Designed a system based on the Deep Work methodology featuring a dynamic efficiency algorithm.
- Built a 100% offline architecture to maximize cognitive focus and minimize distractions.
